### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 32-36.

In Abstract, page 112, delete lines 20-26.

In Abstract, page 112, delete spacing between the first and second paragraph.

Applicant's election of Group I in the reply filed on February 15, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

This application is in condition for allowance except for the presence of claims 32-36 directed to the invention non-elected without traverse. Accordingly, claims 32-36 been cancelled.

### **Reasons for Allowance**

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the claimed wavelength conversion element comprising plural prismatic ferroelectric single crystals having at least five planes disposed in a holder, each of the crystal includes a domain inversion structure with a predetermined period in a direction perpendicular to the polarization direction; and the direction

Art Unit: 2874

perpendicular to the polarization direction of each crystal is the same as those of other crystals. The prior art fails to disclose or suggest the claimed wavelength conversion element including a plural cylindrical ferroelectric single crystals disposed in a holder with respective cross section of crystals being virtually completely round; each of the crystal includes a domain inversion structure with a predetermined period in a direction perpendicular to the polarization direction; and the direction perpendicular to the polarization direction of each crystal is the same as those of other crystals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art documents submitted by Applicant(s) in the Information Disclosure Statement(s) filed on 04/11/06 have all been considered and made of record (note the attached copy of form(s) PTO-1449).

None of the references cited in IDS disclose or suggest the plural crystals arrangements in the holder as claimed. In particularly, Shichijyo et al discloses a plural crystals in Figs. 4, 6, and 9, however fails to disclose or suggest the crystals in a holder having at least five planes, each of the crystal includes a domain inversion structure with a predetermined period in a direction perpendicular to the polarization direction; and the direction perpendicular to the polarization direction of each crystal is the same as those of other crystals.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mohatt et al discloses a wavelength conversion device including a single ferroelectric crystal with a temperature control element. Okazaki discloses an optical wavelength converter including a single crystal with a temperature regulator circuit.
